

# Mel's Protocol

I learned when I had this disease only the people who have Morgellons can understand and share their knowledge with other Morgellons sufferers. I stumbled upon (or so it seemed at the time) the combination of things that cured me, and I knew it was my duty to share it with the world.

Let me make this perfectly clear to everyone who reads this website or undertakes this protocol.

**I DO NOT OWN ANY STOCK, NOR DO I HAVE ANY FINANCIAL RELATIONSHIPS** with any of the companies that make the products that are part of the protocol. I refuse to accept any money from any of these companies because it will then tarnish the integrity of my intent.

We have observed over time that once a person takes the Logos Nutritionals [Morgellons Support Kit](#) for 90 days, they are greatly stabilized by the dramatic improvement of their detoxification systems, digestion, organ function and the lowering of the overall burden on their immune system.

The foundational support offered in the protocol is designed to restore integrity to the bioterrain and reduce chronic inflammation and calcification... which over time rids the body of biofilms and accumulated toxicity.

As I have mentioned from the beginning of the creation of this website, all of our bodies are slightly different and therefore may require a different anti-biotic or anti-fungal medication than the ones that worked for me.

Many of your questions may be answered by viewing our [FAQ Page](#)

The two most discussed thoughts from our website are: all of our bodies are slightly different, and first do no harm. Try to develop a working relationship with a medical practitioner who can monitor your progress.

No matter what you decide, please do not mix protocols as that may cause imbalances. Find the protocol that best works for you and stick with it.

**Disclaimer: The statements made about the following products have not been evaluated by the FDA. The information contained herein is for educational purposes only, and is not intended to diagnose, treat or cure any disease or illness.**

## **THIS IS THE PROTOCOL I USED TO RID MYSELF OF MORGELLONS:**

7:30 AM - Upon rising, on an empty stomach, I took a tablespoon of **MolecuLa Silver** under my tongue and left it there for a while before I swallow it.

8:30 AM - I took (1) **Complete Thymic Formula** (Immune System tablets), (1)**Essential Flora** (probiotic), (1)**Ubinol CoQ10** and (1) **MagnifiCal**(to reduce calcification). This should be taken with food.

10:30 AM - I took (1) **Bactrim DS 800** - 160 tab antibiotic and 3 drops **Oil of Oregano** (antifungal).

12:30 PM - I took (2) **Complete Thymic Formula**, (2) **Essential Omegas**, (1) **Essential Digestion** and (1) **Liver CS Plus** (detox support) with food.

4:30 PM - I took (2) **MagnifiCal**,(1) **Essential Flora**, (1)**Ubinol CoQ10** ,(1) **Essential Omegas**, (1) **Liver CS Plus** and (1) **Essential Digestion**.

Bedtime - I took (1) **Bactrim DS 800** - 160 tab antibiotic and a maintenance dose of MMS (see "What is the Way Mel Used MMS" on [FAQ Page](#) for more info on maintenance dose).

## **THIS IS THE PROTOCOL AS IT HAS EVOLVED TO DATE:**

**PLEASE NOTE: I have been well for over three years now, but Logos Nutritionals has continued to develop new products to aid in the fight against Morgellons.**

**Although they are not part of my original protocol, they have proven to be strategic additions to accelerate healing and to lower the incidence and severity of Herxheimer (detox) responses.**

**The current protocol includes the new Logos formulas available in the Morgellons Support Kit Extension which are inserted in their appropriate place.**

**In order to optimize detoxification pathways and minimize herxheimer reactions, the Extension Kit products should be added as you start your second month of the protocol.**

7:30 AM - Upon rising, on an empty stomach, take a **MagnifiZyme** and a glass of water. Wait about ten minutes and take a tablespoon of **MolecuLa Silver** under your tongue and leave it there for a while before you swallow it.

8:30 AM - Take (1) **Complete Thymic Formula** (Immune System tablets), (1)**Essential Flora** (probiotic), (1)**Ubinol CoQ10**, (1)**Candida Rid**(antifungal) and (1) **MagnifiCal** (to reduce calcification). This should be taken with food.

10:30 AM - Take (1) **Olive Leaf Extract** (natural antibiotic), and 1,000 mg **MSM**. (Oil of oregano no longer needed since it is in **Candida Rid**).

12:30 PM - Take (2) **Complete Thymic Formula**, (2) **Essential Omegas**, (1) **Candida Rid**, (1) **Essential Digestion** and (1) **Liver CS Plus**(detox support) with food.

Evening Meal - Take (1) **Essential Flora**, (1) **Ubinol CoQ10** ,(1) **Essential Omegas**, (1) **Liver CS Plus** and (1) **Essential Digestion**.

**New Bedtime Regimen** - Take (2) **MagnifiCal**, (2) **MagnifiZyme**, (1) **Olive Leaf Extract**, 1,000 mg MSM, and a maintenance dose of MMS (see "What is the Way Mel Used MMS" on [FAQ Page](#) for more info on maintenance dose).

## MEL'S PROTOCOL PRODUCTS

Below are the products that make up our protocol. You may order them in kits or individually. **Click on the picture of the Morgellons Support Kit to order directly from a special Morgellons Support Page on the Logos Nutritionals website. The A2Z products can be ordered online once again. They can also be ordered by phone.**

The protocol consists of products that are designed to restore your health in several distinct ways:

1. The Logos Nutritionals products provide a solid foundation of nutritional support needed to restore the bioterrain... as well as access to a variety of high quality nutraceuticals.
2. A2Z Corporation provides natural anti-microbials (MMS, Molecula Silver) that are designed to accelerate healing by reducing body acidity and overall infection load on the body.
3. Any pharmaceutical needed would obviously require a physician's prescription and supervision. Those who lack physician access or cooperation should investigate the natural antimicrobial alternatives (**Candida Rid**, **Olive Leaf Extract**, **Monolaurin**, **Colostrum**, and **Parabolish**) offered to Morgellons sufferers by Logos Nutritionals (click on pic below).
4. Once you have been on the protocol for a while and have stabilized, lab testing may help fine tune the protocol based upon each individual's anti-biotic and anti-fungal needs.

### Logos Nutritionals Morgellons Support Kit

Logos Nutritionals Morgellons Support KitThe Logos Nutritionals **Morgellons Support Kit** provides comprehensive nutritional support to help restore the bioterrain and strengthen body systems. Specific product info is available on the Logos site (Click the Pic).

The kit features the **Burgstiner Wellness Protocol**, which includes **Complete Thymic Formula**, **Essential Digestion**, **Essential Flora**, **Essential Omegas**, **Liver CS Plus**, and **MagnifiCal**.

The full protocol is already discounted 15%, but with the Morgellons Kit you also get a FREE **Ubinol CoQ10** (a \$38.99 value - effectively doubling the discount).

The full retail value of the **Morgellons Support Kit** is \$180 - Logos is charging only \$120).

In addition to the Logos **Morgellons Support Kit** and **Morgellons Extension Kit**(which consists of the most commonly added products used to accelerate the healing process and lessen herxheimer detox reactions), various other nutraceuticals are offered at a discounted price to help deal with specific challenges.

If you have problems or questions about any Logos product, just call the toll free number (800-556-5530) and speak with Customer Service. Incredibly these days, they actually care.

---

## **A2Z Morgellons Kit**

Morgellon's Kit includes:

- (1) 16oz. bottle of Molecula Silver
- (1) 4oz. bottle of MMS (Sodium Chlorite)
- (1) 4oz. bottle of Citric Acid (50% solution)

This kit retails for \$79, but if you use **MORG20** as a coupon code on your phone order, you will save 20% off this price. Product info appears below. The individual products may be purchased separately if needed. Special discount codes are shown below for each one. (Call 1-702-466-6336) 10am-4pm Pst.

[Click to Order Online](#)

## **MMS (Sodium Chlorite)**

To understand why the **Miracle Mineral Supplement** works one must understand some of the chemistry of chlorine dioxide and some of the chemistry of blood. Chlorine dioxide is a gas that is dissolved in water when in the body. Chlorine and chlorine dioxide have been used as disinfectants for more than a hundred years and there is little doubt that they simply destroy pathogens of all kinds. Both have been used in water purification systems for more than 50 years. In recent years, water purification systems using chlorine has been used less and instead chlorine dioxide is used a great deal more as it has many benefits over chlorine.

Chlorine dioxide is used extensively in water purification systems throughout Europe. Although chlorine dioxide is somewhat more expensive than chlorine, its many benefits over chlorine has resulted in it being used more extensively in water purification systems than chlorine. In 1998 The American Chemical Society, Analytical Chemistry Division said chlorine dioxide is the most powerful antimicrobial agent known to man.

## **How does MMS work in the body?**

Once it is introduced into the bloodstream, chlorine dioxide performs a highly energetic acceptance of four electrons when it comes across any cell that is below a pH value of 7. This means that diseased cells are essentially vaporized (i.e., 'oxidized') while healthy cells are unaffected.

This product (includes a 4 oz bottle of citric acid) retails for \$40, but if you use **Morg20** as a coupon code on your phone order, you will save 20% off this price.  
(Call 1-702-466-6336) 10am-4pm Pst.

### **Molecula Silver**

**Molecula Silver** is a form of ionic silver that has been electronically pushed into a state where it develops a self-perpetuating pulse rate that is eternal in nature and pulses too rapidly for individual recording. One definition given by a noted physicist, Robert C. Beck, is that this silver when processed by this method, loses its identity as a traceable element i.e. is not identified as a "particle" and acts more like a gas.

Other research professionals have tested this silver and found the exact same thing. It is etheric in nature but carries the signature of the element silver. The largest particle size of silver to be found is .062 nano's which is over 60 times smaller than angstrom in size. Only 1.7 to 5 ppm can be found in the product and yet it has the power of 2,000 ppm. 100% of the body's membranes are penetrated. **Molecula Silver** has been extensively tested on literally tens of thousands of people with impressive success.

This product retails for \$39, but if you use **Morg20** as a coupon code on your phone order, you will save 20% off this price.  
(Call 1-702-466-6336) 10am-4pm Pst.

### **Bactrim DS 800 - 160 tab**

What is **Bactrim**?

**Bactrim** is a prescription drug.

**Bactrim** contains a combination of sulfamethoxazole and trimethoprim and is supplied in tablets and a liquid suspension. Sulfamethoxazole and trimethoprim are both antibiotics that treat different types of infection caused by bacteria.

**Bactrim** is used to treat ear infections, urinary tract infections, bronchitis, traveler's diarrhea, and Pneumocystis carinii pneumonia.

**Bactrim** may also be used for other purposes.

Bactrim worked well for me, but GPL testing has shown other individuals to need different antibiotics specific to their needs. Regardless of which antibiotic is needed for you, you will need a physician's prescription to obtain it and supervision to monitor you for potential side effects.

## Lab Testing Options

# Testing Options

When my struggle with Morgellons began, I was very blessed to have a solid relationship with my primary care physician, Dr. Shannon Zamboni. She was as perplexed as I was about what was happening to me, but she knew that I wasn't delusional.

Shannon is a delightful person and a true professional. She did NOT try to sweep all of this under the rug and hide her lack of understanding behind the standard DOP diagnosis. Instead, she embraced the challenge with me and stood by me to protect me from myself and others while we investigated the disease and experimented with my options.

Modern science has developed some amazing tools that can peer into the human body and deliver a wealth of valuable information. While there is still no definitive "Morgellons Test", there are testing options that can help your doctor assess where you are now and monitor your progress as Shannon did for me.

A **CBC (Complete Blood Count)** will give your doctor a good deal of information about the number and types of cells in the blood and help them identify infections, conditions such as anemia and many other disorders. A blood smear or live blood microscopy can render even more information about the number, type and shapes of the blood cells.

A **Comprehensive Metabolic Panel** is a blood test that measures your sugar (glucose) level, electrolyte and fluid balance, kidney function and liver function. This panel measures the blood levels of sodium, potassium, calcium, chloride, carbon dioxide, glucose, blood urea nitrogen, creatinine, protein, albumin, bilirubin, and liver enzymes.

There are a number of further tests your physician may want to run, such as:

**Inflammatory Markers such as CRP (C Reactive Protein) and TNF**

**G6PD**

**Methemoglobin**

**Serological test for Lyme, Chlamydia Pneumonia, or other pathogens**

**Heavy Metal Toxicity**

The standard CBC (Complete Blood Count) and Metabolic Panel will reveal much about your metabolic status and specific challenges. The G6PD testing may be important in long term Bactrim therapy (should your doctor choose to put you on it) as well as use of MMS. Methemoglobin testing may also be considered in people using long-term Bactrim or MMS.

## Further Testing Options

Once you stabilize on the protocol, your doctor may wish to consider further testing to identify specific challenges (infections or infestations) and gain insight into any remaining metabolic imbalances or inefficiencies.

Great Plains Labs and Metamatrix Labs offer **Comprehensive Stool Analysis** and/or **Organic Acid Testing** to screen for a wide number of pathogens and measure the endpoints and byproducts of metabolism.

In their Case Study, Morgellons.org lists the laboratory tests that were done along with some of the possible reasons for some values being out of norm.

Most of these tests are included in standard testing your physician will be familiar with and will probably want to run. There is also a list in the Case Definition page of Common Laboratory Abnormalities.

### [Common Laboratory Abnormalities](#)

**Elevated cytokines:** *TNF-alpha, IL-6, TGF-beta;*

**Elevated inflammation markers:** *C-reactive protein and TNF-alpha;*

**Immunodeficiency markers:** *low CD 56 or CD 57 number, low CIQ, low IgG subclasses 1 and 3;*

**Hematological abnormalities:** *low hemoglobin and hematocrit with abnormal RBC indices;*

**Biochemical abnormalities:** *elevated blood glucose, insulin, calcium, and serum Homocysteine, and low serum potassium and magnesium.*

*The consistent finding of numerous unexpected biologic agents at atypically high levels (some thought to be non-pathogens, others definitely pathogenic) strongly supports that an immune deficiency state exists in Morgellons patients.*

*Agents identified serologically include many zoonoses (intermittently and in low numbers) such as Borrelia (at least five species) and Babesia, a single recently found gram negative bacterium, most herpes viruses, some strongly activated such as VZV and HHV-6, several mycology species (esp. Tineas), and particularly in those we have labeled Morgellons patients, parasites (species will be elaborated following PCR sequencing).*

*This case study suggested Chlamydia pneumonia (Chp) is one candidate for the initial etiology of Morgellons disease via generation of an immunodeficiency state.*

You might want to print the following document and give it to your doctor:

### [Practitioner Letter](#)

I hope this helps you in your quest for renewed health.

God Bless, Never Give up Hope!
